

Cabinet

InfoSealPS

Custom built cabinet for PS100, PS200 and other office equipment in your office or mailroom.

This cabinet comes with sturdy casters and guarantees high shock resistance during normal use. It is strong enough to support a desktop pressure sealer such as the PS100 or PS200.

The high quality compressed particle board features a better noise reduction (compared to a standard metal cabinet), resulting in quieter working environment.

Now you can move your cabinet without lifting it! Simply unlock the cabinet's wheels and move it together with the machine. The twin hinged doors close to leave your office looking neat and uncluttered, and the shape, design and color of the cabinet is perfectly designed to match the specific style of your machine.
